

Wednesday, August 10th

Session 4: Cell Migration & Chemotaxis

Chair: **Peter Hordijk (NL)**

Time: 11:15 – 13:00

Lecture Hall: H46

11:15	T13: Stefanie Michaelis (G) Recent advances in impedance-based wound-healing assays to monitor cell migration in different experimental scenarios.
11:45	T14: Fabian Bonetto (ARG) Spectral Impedance Measurements during Wound Healing Compared to Standard ECIS Measurements applied to Cell Differentiation.
12:15	T15: Andreas Janshoff (G) Cell locomotion monitored by impedance analysis - from Dictyostelium discoideum to primordial germ cells.
12:45	T16: D.S.G. Nielsen (DK) Administration of protein kinase d1 induce migration of intestinal epithelial cells <i>in vitro</i> .
13:00	Lunch & Poster Session 1
